

STOP IN THE NAME OF COST!

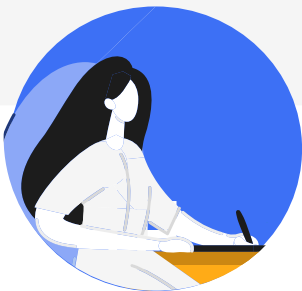

So, your provider recommended next steps for care. Before you schedule, STOP!

Would you walk onto the car lot, ask a salesperson for a recommendation, and drive it away without learning the price? NO! Your doctor wants what's best for your health, but may not know what's best for your wallet. Instead, stop — and give HealthJoy time to help you high-quality, high-value care.

When they recommend a specialist...

Ask for the details of their specialist recommendation in a printout and request a provider search.

When they recommend a procedure...

Ask for the procedure code in a printout and request a facility search.

When they recommend a test...

Ask for the lab test code in a printout and request a provider search.

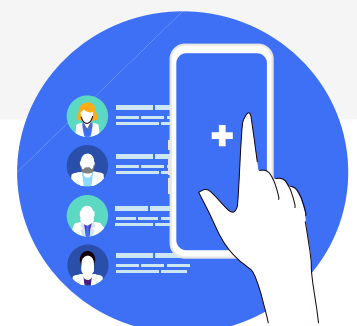

When they prescribe a medication...

Ask for a printout of the recommended prescription and schedule an Rx Savings Review.

Any time you visit a provider...

- Request a provider search before scheduling.
- Keep track of your billing statements. If you spot an error (or just want to double-check charges), just snap a photo and upload to HealthJoy for a Bill Review.
